

National Enzyme Company

National Enzyme Company was founded in 1932 by Dr. Edward Howell, they are the leader in nutritional enzyme technology. From research and development to marketing support, NEC provides manufacturers and distributors worldwide with digestive and systemic formulas using proven, patented blends. Whether creating or improving an existing formulation for their customers, NEC continues to improve the well being of our planet with enzymes.

NEC is the most experienced manufacturer specializing in enzyme-based dietary supplements. Utilizing **state of the art technology in production equipment, and adhering to strict FDA current Good Manufacturing Practices** NEC is capable of handling all client needs, including precision blending, encapsulating, full-service bottling and labeling. The manufacturing staff at National Enzyme Company brings unmatched expertise and experience to work every day. **NEC has the ability to blend 300 metric tons of powder, encapsulate 1.3 billion capsules and package 14.2 million bottles annually.**

National Enzyme Company is a global marketer. It offers **customized marketing support** to match the needs of each customer. Through a comprehensive advertising, training, and public relations program NEC reaches consumers, retailers, clinical dietitians, and healthcare providers.

More than science, there is an art to the creation of a complex formula that combines all the needed elements for a complete dietary supplement. Creating these unique formulations requires a deep **knowledge and experience in enzymology, biochemistry, phytochemistry, physiology, quality control, and manufacturing.**

Cutting edge technology and the discovery of new enzyme applications allow our Product Development Team to create **custom formulations** by combining **proprietary blends** of broad-spectrum microbial and plant enzymes, herbs, probiotics, and other ingredients to meet specific requirements.

Research has shown that the activity of an enzyme is the only way to ensure its efficacy. National Enzyme Company enzymes are declared by activity units instead of weight; providing yet another way for our clients to receive superior quality products.

National Enzyme Company has a clear dedication to the quality and safety of our products.

Skill and commitment to excellence are vitally important because manufacturing enzyme based supplements is a complex operation. NEC **sources the highest quality ingredients** which then undergo extensive testing by our **in-house laboratory** which verifies the quality and potency of those ingredients. The analytical skills required to effectively screen enzymes are extremely specialized. These unique services and qualifications are extended to our customers by virtue of our **highly-trained laboratory staff**.

GMPs set forth by the FDA ensure product safety in the marketplace, NEC exceeds these GMPs. In addition, NEC is **independently GMP certified by NSF, Int.** NSF is the world leader in product certification, education, and risk-management services for public health and safety. NEC has also been audited and **GMP certified by TGA**, the Therapeutic Goods Administration of Australia (Australia's equivalent to our FDA) as an overseas manufacturer.

NEC is an approved Occupational Safety and Health Administration (OSHA) **Voluntary Protection Program (VPP) Star site**. VPP participants establish and maintain excellent safety and health programs in their workplaces, and are recognized by OSHA as models for the industry. Less than 0.1% of the six million companies OSHA oversees can claim this title.

NEC is the ONLY nutritional company in the United States that is an OSHA star site.

Over the past seven decades, National Enzyme Company has awakened the nutritional industry to the benefits of enzymes as dietary supplements. As **the oldest enzyme company in North America**, NEC's digestive and systemic products are the most trusted and proven in the market, resulting in quality products with a **high rate of repeat sales**. Unsurpassed by any other, NEC creates innovative enzyme products, manufactures with the highest quality ingredients, offers advanced technical support, and **personalized customer service** found nowhere else in the industry. Following the mission first established by Dr. Howell,

NEC continues to improve the well being of the world with enzymes.
